## February Is Children's Dental Health Month: Turn Up Your Smile Power!

### Quote:

You don't have to brush your teeth-just the ones you want to keep.

~Unkown

Please join us in welcoming our new team members:

**Jessica  
(Receptionist)**

**Lezlie  
(EDDA)**

Have something you want to announce or brag about in our newsletter? E-mail Tabatha at:

tabatha.b  
@cwdental.net

Have you ever heard anyone say that, "It's just a baby tooth."? Contrary to popular belief "baby teeth", or primary teeth, are just as important as permanent teeth and it is best if they are kept in place until they are lost naturally. Primary teeth serve a number of critical functions such as:

- Help your child maintain good nutrition by permitting them to chew properly.
- Are involved in speech development.
- Help the permanent teeth by saving space for them. A healthy smile can help children feel good about the way they look to others.

It is very important that we assist and encourage children to get an early start in regular dental care. Early detection of cavities can also help deter damage to underlying permanent teeth. Schedule your child's check up today!

## Valentines Special!

Having trouble deciding what to get your Valentine this year? How about the gift of a whiter, brighter smile? During the month of February, our ZOOM! in-office procedure is only:

**\$349!**

Please contact our office for further de-

## ...Every Time
